

BRC 2017

360° around the bariatric patient

*The 4th bariatric rehabilitation congress
with 360° focus around the bariatric patient*

22-23 November 2017 VIA University College, Campus Nord in Aarhus

Come to Bariatric Rehabilitation Congress 2017

The 4th Bariatric Rehabilitation Congress 2017 will be hosted by XXL-Rehab, The Danish National Obesity Board and VIA University College on 22-23 November 2017 in Denmark. The focus will still be a 360° perspective on the bariatric patient.

The congress this year will be planned in collaboration between XXL-Rehab, The Danish National Obesity Board and VIA University College to develop and expand The Bariatric Rehabilitation Congress. BRC2017 will be held in at VIA University College, Campus North in Aarhus, The European Capital of Culture 2017.

BRC2017 will in particular focus on the connection between knowledge, competencies and skills. The location at Campus North has

been chosen to establish a dynamic framework between all of the three aspects in working professionally with a bariatric patient. The congress will host both presentations and a variety of workshops in the afternoon program.

BRC2017 will once more contribute to the creation of networks both nationally and internationally between professionals working with obesity both monodisciplinary and interdisciplinary. BRC2017 will also be open to abstracts for two workshop presentations.
